# Servers for Software-Defined Storage

## 2017 Brand Leader Survey Methodology

- **Brand Leader Reports are designed to measure the pulse of brand leadership in specific product categories using independent, non-sponsored surveys with at least 200 respondents.**
- **The *Servers for Software-Defined Storage* brand leader survey was conducted in March, 2017.**
  - Respondents were solicited from over 1,000,000 members of 100+ online IT groups, and from the IT Brand Pulse IT professional database.
  - Two hundred and eleven IT Pros responded to this survey.
  - Responses were collected using an online survey engine.
- **In each part, respondents were provided with a product category description, randomly-listed vendor choices (plus an “Other” answer choice to add a vendor, if applicable), and were asked six questions:**
  1. Who do you perceive as the Servers for Software-Defined Storage **market** leader?
  2. Who do you perceive as the Servers for Software-Defined Storage **price** leader?
  3. Who do you perceive as the Servers for Software-Defined Storage **performance** leader?
  4. Who do you perceive as the Servers for Software-Defined Storage **reliability** leader?
  5. Who do you perceive as the Servers for Software-Defined Storage **service & support** leader?
  6. Who do you perceive as the Servers for Software-Defined Storage **innovation** leader?

### 2017 Brand Leader Survey

# About Servers for Software-Defined Storage

For most of the last 20 years, enterprise storage has consisted of proprietary storage controllers and devices (HDDs) packaged together in an array. The overall solutions also included a variety of server-based data management software from the array vendor such as replication, de-duplication, snap-shots, and archiving, to name a few.

Hyperscale cloud service providers changed the game by deploying on a massive scale what used to be controller-based storage array system software—plus data management software—all as industry-standard server applications. The trend is now sweeping the enterprise IT industry with dozens of block, file and object storage applications, and a new generation of servers designed for software-defined storage.

# Software-Defined Storage Applications

□ Acronis Storage □ Amax StorMax SDS □ Atlantis USX □ Cloudian □ Compuverde □ Conduvix V-locity □ DataCore Hyper-converged Virtual SAN □ Datera □ Elastifile ■ EMC ScaleIO □ EMC ViPR □ FalconStor FreeStor □ Formation Data Systems FormationOne □ HPE StoreVirtual VSA ■ HPE SimpliVity □ Hedvig Distributed Storage Platform □ IBM Spectrum Accelerate ■ IBM Cloud Object Storage □ ioFABRIC Vicinity □ Infinio Accelerator □ Maxta MxSP ■ Microsoft Storage Spaces □ NexentaStor Nexenta Edge ■ OpenStack Block Storage Cinder □ Peaxy □ Pivot3 □ Primary Data DataSphere ■ Red Hat Ceph □ Red Hat Gluster □ SanDisk ioTurbine □ SanDisk FlashSoft ■ Scalify Ring □ SoftNAS □ Springpath □ StarWind Virtual SAN □ StorMagic ■ SUSE Enterprise Storage ■ Symantec Storage Foundation □ SwiftStack □ Talon Storage □ Veritas InfoScale ■ VMware vSAN ■ VMware Virtual Volumes □ Zadara Storage

## 2017 Survey Summary Analysis

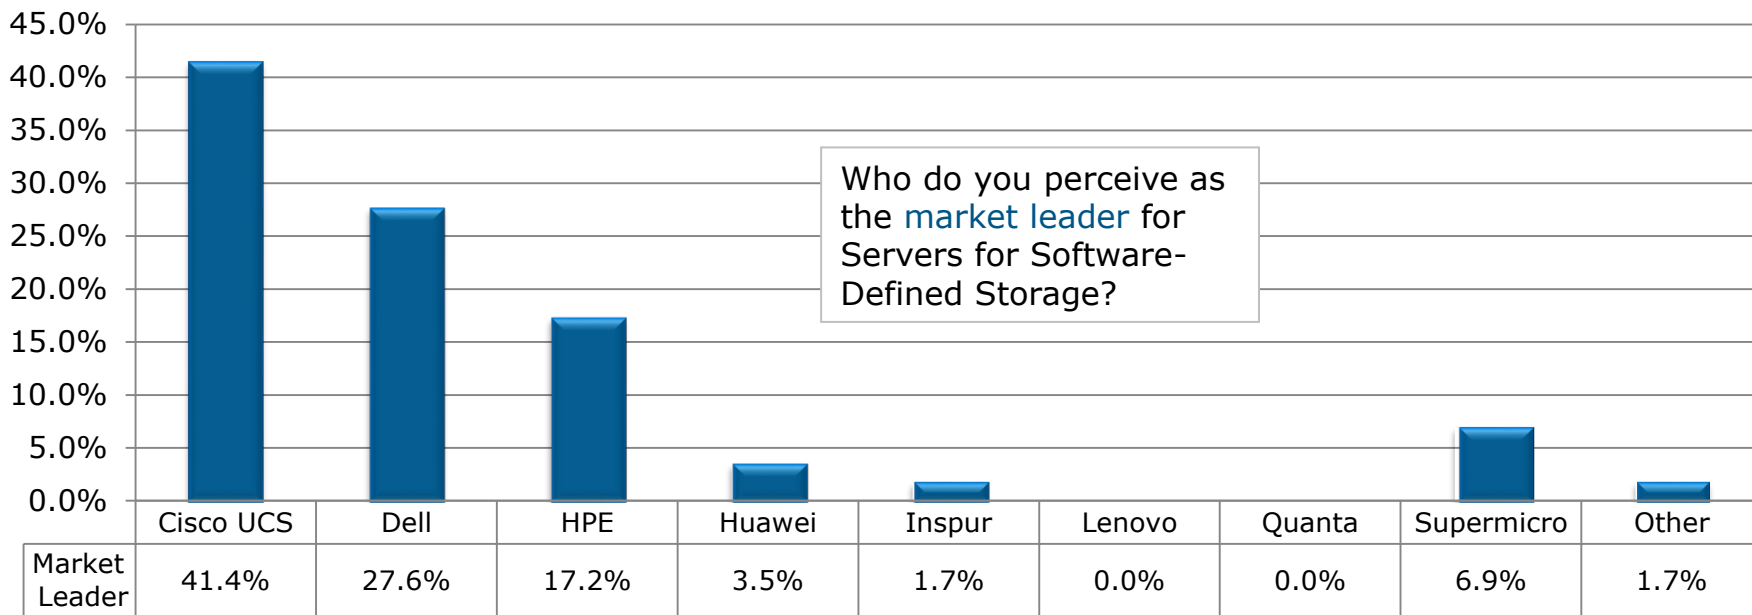

- **Cisco Voted Market Leader...Again**
  - In the second annual survey covering servers for software-defined storage, Cisco, once again, was voted the Market Leader. Cisco scored big in this brand category: The spread between first and second place (Dell) was the highest among the five leader categories won by Cisco. Cisco's sweep of five out of six categories suggests the breadth of their best-in-class capabilities is driving IT pro perception of market leadership in an ultra-competitive field.
- **Cisco Picked as Performance, Reliability, and Service & Support Leader**
  - Storage is the most conservative, risk-averse segment of enterprise IT, which may indicate why the percentage of global IT pro voting leaped in 2017 for Cisco servers utilized for software-defined storage. As the dominant brand name in networking (which happens to be the second, most conservative segment), Cisco—and its UCS servers—are bolstering a reputation for outstanding performance, reliability and support.
- **Cisco Chosen as Innovation Leader**
  - Servers optimized for software-defined storage are different than servers fine-tuned for business workloads. IT pros recognize Cisco as a leader in a package design and embedded networking tailored for hosting software-defined storage workloads.
- **Dell Selected as Price Leader**
  - In nearly every enterprise IT brand leader survey that has included Dell, the company is named as the Price Leader. This product category is no different. For the second consecutive year, Dell was selected as the price leader for servers for software-defined storage.

**IT BRAND**  
**PULSE™**

The logo features the text "IT BRAND" in a large, bold, sans-serif font. The "IT" is light blue, while "BRAND" is white. Below "IT BRAND" is the word "PULSE" in a smaller, bold, white sans-serif font, followed by a trademark symbol (TM). A trail of approximately 20 grey, semi-transparent spheres starts from the right side of "PULSE" and curves upwards and to the right, ending near the "ND" of "BRAND". The background is a dark blue gradient with lighter blue curved shapes. A solid orange bar is at the top, and a white tab-like shape is at the bottom right.
